Start!

Polling Station

1

Voter Check-In

Arrive at polling station and check-in with your Voter ID

Vote!

2

Vote Storage

Your vote is anonymous! Once you approve your vote and print out an 'A' and 'B' Ballot, it is recorded to an 'A' and a 'B' storage device to be used as part of the public audit process later.

Vote Anonymously

Vote Anonymously using the Ballot Marking Device, review your vote, and Print the 'A' and 'B' Ballots

Vote Storage

Your scanned 'A' and 'B' Ballots are stored on 'A' and 'B' storage devices just like on the Ballot Marking Device. This will be used as part of the public audit process later.

Scan and Verify

3

Vote Scanning

As part of the Total-Integrity voting configuration, your 'A' and 'B' Ballot is scanned and recorded.

Poll Worker

4

Your Ballot Record

After the Notary Public stamps your Ballots, the 'A' Ballot is stored with the Elections Officials and the 'B' Ballot is immediately returned to you. This 'B' Ballot will be used as part of the public audit process.

Poll Worker Certification

A Poll Worker, who is an active Notary Public, stamps both your 'A' and 'B' Ballot.

Vote Counting and Uploads

Once the polls are closed, the 'A' and 'B' cards from the Ballot Marking Device and the Ballot Scanning Device are uploaded to the secure portal.

Poll Data Upload

5

Uploading Poll Data

After the polling site is closed for the election, Poll Workers upload the data from the Ballot and Scanning devices.

Vote Verification!

6

Your Ballot Record

After the Notary Public stamps your Ballots, the 'A' Ballot is stored with the Elections Officials and the 'B' Ballot is immediately returned to you. This 'B' Ballot will be used as part of the public audit process.

Verify and Audit Your Vote!

After the polls data is uploaded you can verify your vote was recorded and counted properly by visiting the Online Voter Portal, all anonymously.

Finish!
